

9 mm Cable pulling adapter for bare cables

Structure cabling installers can now perform **standardized indoor installations** that are **faster** and which minimize damages to building structures.

Helipuller - 9 mm

- **Helipuller** is a cable pulling adaptor which can be easily field installed and removed onto a 9 mm cable
- Facilitates easy and safe pulls through 3/4" diameter holes or conduits
- One or many pulling sticks can easily be screwed to the **Helipuller**
- A rope pulling eye can also be screwed to the **Helipuller** to help pulling into a 3/4" inner diameter conduit
- **Helipuller** is engineered to grip on the outer sheath of a 9 mm diameter cable with our patent pending HelicalGrip™ technology
- Works with any cable between 6 and 9 mm diameter such as AWG 24 Cat 6, 6A, fiber optic, coax and even audio, security or electrical cables
- Made in recyclable plastic
- Reusable and affordable
- Multiple patents pending
- Made in Canada
